## **DETAILED ACTION**

1. Claims 1-9 are presented for examination.

### ***Claim Objections***

2. Claim 1 is objected to because in line 6, "pattern" should apparently read as --patterns--.  
Appropriate correction is required.

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-9 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 6,249,891. Although the conflicting claims are not identical, they are not patentably distinct from each other because both the present application and the patent claim apparatus or method for verifying adequacy of test patterns substantially comprising the same elements: LSI tester simulator, cycle/event converter, first memory, second memory, and comparator for synchronizing. The difference between the invention claimed in the present application and that of the patent is such that it would have been obvious to a person having ordinary skill in the art to implement the claimed invention since one

of ordinary skill in the art would know to utilize a dump file storage an a determination timing default detecting unit if judge necessary to accomplish a desired function.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
